

## Zipco Bird Spike (1 box of 10 Bird Spikes)

### Quick Overview

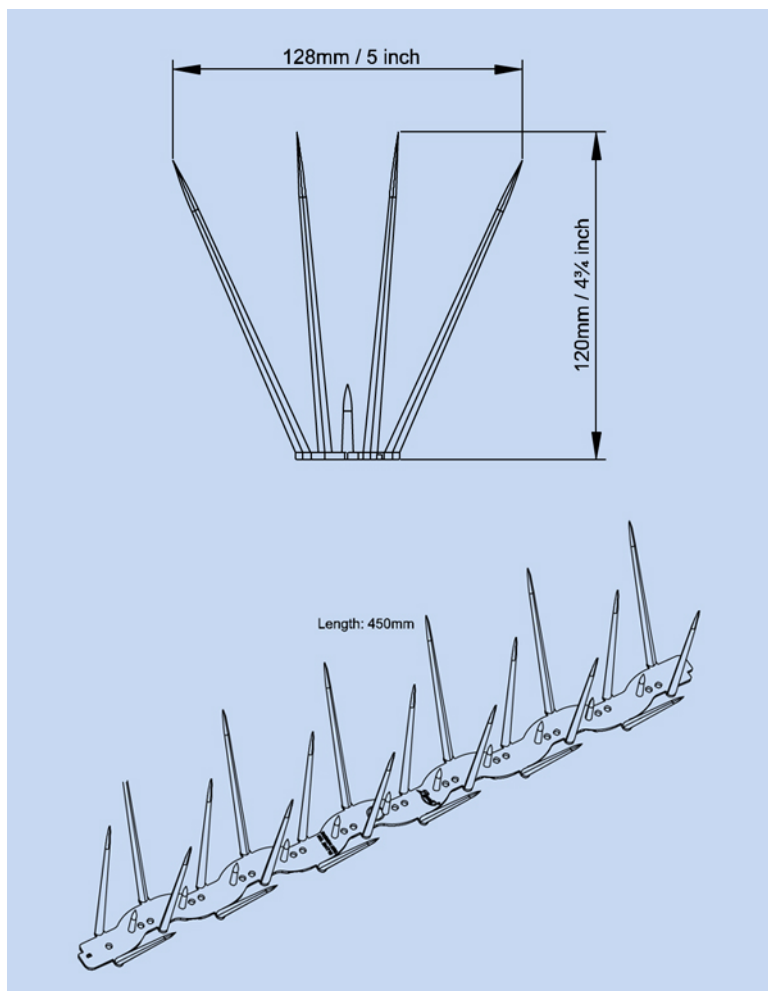

- Humane method to stop birds, pests or vermin from landing and roosting on ledges, roofs of buildings.
- **Harmless:** Does not harm birds as they do not land and fly away.
- Smaller spike prevents rats and other vermin. Ideal for compound walls.
- **Flexible:** Can be applied on curved surfaces, circular pillars and it can be to length for exact fit.
- Being made of Polycarbonate -
  - a) **Weather Resistant:** It is suitable to withstand any kind of adverse climatic condition and temperature.
  - b) **Safe:** It is non - conductive and safe, can be easily attached to TV discs/antennas or cables running across the ledges / buildings.
- **Cost Saving:** Easy to install, maintenance free and keeps the building clean and free from bird droppings.
- Bird Spikes are perfect for bird control in office buildings, hotels, hospitals, residential homes, warehouses, factories, etc. It prevents birds like pigeons, crows and kites from landing, perching or roosting on surfaces like windows, ledges, air conditioners, etc. The spike strips act as an effective deterrent and do not hurt the birds. When the birds see an area protected by the bird spikes, they simply fly away without injuring themselves, therefore making this a humane product.
- Manufactured out of Polycarbonate, it is very strong and weather resistant. The strips are each 450mm long with breakable segments for fitment. Designed to interlock while installing, make sure you start from the far edge and break off the extra segments that do not fit. Use the broken segments to fill any gaps, so that a perfect fit is made throughout the complete length.
- **Price below is for 1 box of 10 Bird Spikes.**

### Specification

Product	Code	Size (each)	Finish
Bird Spike	6/4/BS 18	450mm	Clear

### Fitting Instructions

- The first step is to measure the length and width of the area that you want protected. It is important that the entire surface be covered with the spike strips so that the birds cannot land behind them and build their nests. In some situations, more than one row may be needed.
- The second step is cleaning up the mess left behind by the birds like bird droppings, nesting materials etc. It is recommended that this area also be disinfected to remove parasites and germs due to presence of bird droppings. Use extreme care when cleaning as bird droppings are the cause of many infectious diseases. We recommend you use a dust mask, gloves and when working at heights of over two meters, it is recommended that a safety harness be used. Make sure the surface is dry after cleaning.
- The third step is to determine how to attach the strip. Use wood screws to fix the spikes on to wooden surfaces. When attaching the spike strips to concrete, stone or any other hard surfaces, use an outdoor construction grade adhesive, like Silicon glue. Use a thick layer of adhesive if surface is uneven. When attaching to Pipes, we recommend plastic cable ties to secure the spike strips in place. This is also easy to remove if you need to do any maintenance and the spikes need to be removed.

## Care Instructions

- Please follow the fitting instructions carefully. Not following these instructions can lead to damage of the product.
- Please be mindful of pokes and injuries during installation that may be caused due to the sharp edges of the spikes – always wear thick gloves if installing yourself.
- Do not clean or paint with any chemicals – this may cause damage to the product.
